Office Action Summary

Application No.

09/998,578

Applicant(s)

SCHEMMANN ET AL.

Examiner

Hanh Phan

Art Unit

2638

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 November 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 24 and 25 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 25 is/are allowed.
- 6) ☒ Claim(s) 24 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 08/18/2004.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kikuchi (US Patent No. 6,671,464) in view of Strasser et al (US Patent No. 6,658,215).

Regarding claim 24, referring to Figure 5, Kikuchi teaches a method for compensating for PMD effects electronically comprising:

receiving (i.e., O/E converter 120, Fig. 5) a set of I and Q data streams;
a compensation circuit (i.e., compensating circuit 100, Fig. 5) for compensating the polarization mode dispersion of the signal (Fig. 5, col. 8, lines 40-60).

Kikuchi differs from claim 24 in that he does not specifically teach compensating for phase noise and first order polarization mode in a first stage, the outputting then signals from the first stage to a second state for compensating high order PMD effects. However, Strasser in US Patent 6,658,215 teaches compensating for phase noise and first order polarization mode in a first stage, then outputting the signals from the first stage to a second state for compensating high order PMD effects (see Fig. 3, col. 5,

lines 45-67 and col. 6, lines 1-18). Therefore, it would have been obvious to one having skill in the art at the time invention was made to incorporate the compensating for phase noise and first order polarization mode in a first stage, then outputting the signals from the first stage to a second state for compensating high order PMD effects as taught by Strasser in the system of Kikuchi. One of ordinary skill in the art would have been motivated to do this since Strasser suggests in column 5, lines 45-67 and col. 6, lines 1-18 that using such the compensating for phase noise and first order polarization mode in a first stage, then outputting the signals from the first stage to a second state for compensating high order PMD effects have advantage of allowing compensating the first order and second order polarization mode dispersion of the signal.

4. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kikuchi (US Patent No. 6,671,464) in view of Mecozzi et al (US Patent No. 6,674,972).

Regarding claim 24, referring to Figure 5, Kikuchi teaches a method for compensating for PMD effects electronically comprising:

receiving (i.e., O/E converter 120, Fig. 5) a set of I and Q data streams;
a compensation circuit (i.e., compensating circuit 100, Fig. 5) for compensating the polarization mode dispersion of the signal (Fig. 5, col. 8, lines 40-60).

Kikuchi differs from claim 24 in that he does not specifically teach compensating for phase noise and first order polarization mode in a first stage, the outputting then signals from the first stage to a second state for compensating high order PMD effects. However, Mecozzi in US Patent 6,674,972 teaches compensating for phase noise and

Art Unit: 2638

first order polarization mode in a first stage, then outputting the signals from the first stage to a second state for compensating high order PMD effects (see Fig. 5, col. 7, lines 15-62). Therefore, it would have been obvious to one having skill in the art at the time invention was made to incorporate the compensating for phase noise and first order polarization mode in a first stage, then outputting the signals from the first stage to a second state for compensating high order PMD effects as taught by Mecozzi in the system of Kikuchi. One of ordinary skill in the art would have been motivated to do this since Mecozzi suggests in column 7, lines 15-62 that using such the compensating for phase noise and first order polarization mode in a first stage, then outputting the signals from the first stage to a second state for compensating high order PMD effects have advantage of allowing compensating the first order and second order polarization mode dispersion of the signal.

Allowable Subject Matter

5. Claim 25 is allowed.

Response to Arguments

6. Applicant's arguments with respect to claim 24 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh Phan whose telephone number is (571)272-3035.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Vanderpuye, can be reached on (571)272-3078. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)305-4700.
